

The Mission of the Hazleton Area School District is to educate all students to become self-directed, life-long learners, and responsible, contributing members of society.

Schools are safe and orderly, with students actively involved in learning. We envision a process to re-invent education and to raise the standard of promoting and respecting diversity. All students will learn how to learn, how to manage information, and how to use that information to achieve goals in the least restrictive environment. They will learn to problem solve in a wide variety of settings.

We also believe our schools are strengthened by the collaborative effort of faculty, administration, parents, students, and the community. This community will support, reinforce, and extend the work of the school. We envision a faculty able to exercise its full potential with ample opportunity for professional growth and development. Schools in this vision contain all the resources necessary for effective teaching and learning. Most importantly, we view schools as places with high expectations where all students will have the opportunity to reach their maximum potential.

If you have questions and concerns about public education. We have the experts that can provide answers. We'll be glad to tell you about the programs, personnel, and volunteers that make the Hazleton Area School District a great place to learn and a great place to live.

Our Leadership Team and other District representatives are committed to keeping the community informed about our public schools. Sample topics are listed in our brochure or you can request specific information.

To hear about a topic related to education that has been in the news or you think would be of general interest, we can arrange for a speaker to be at a meeting of your group or organization. The speaker could be a school board member, the Superintendent, a member of the Leadership Team, a principal, teacher, or other District representative with knowledge of the particular topic you choose.
