

Practice 6-4

Special Parallelograms

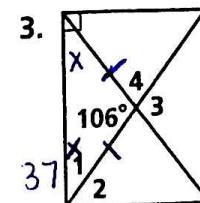

For each parallelogram, (a) choose the best name, and then (b) find the measures of the numbered angles.

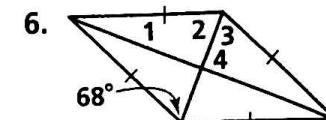

rectangle

rectangle

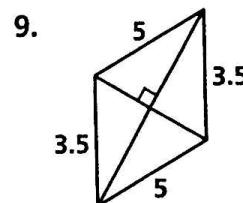

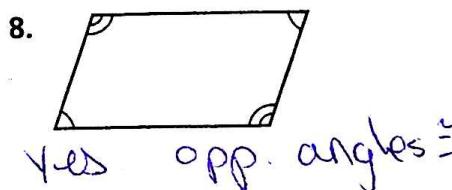

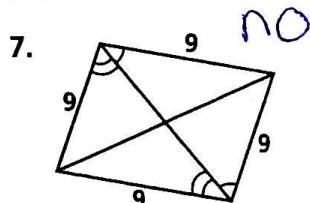

$$\begin{aligned} \angle 1 &= 37 \\ \angle 2 &= 54 \\ \angle 3 &= 106 \\ \angle 4 &= 74 \end{aligned}$$

$$\begin{aligned} \angle 1 &= 22 \\ \angle 2 &= 68 \\ \angle 3 &= 68 \\ \angle 4 &= 90 \end{aligned}$$

The parallelograms below are not drawn to scale. Can the parallelogram have the conditions marked? If not, write *impossible*. Explain your answer.

H I J K is a rectangle. Find the value of x and the length of each diagonal.

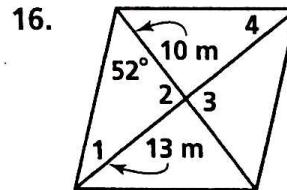

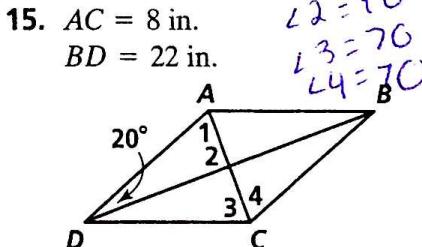

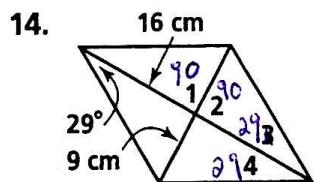

$$10. \quad HJ = x \text{ and } IK = 2x - 7 \quad \begin{matrix} 7 \\ x = 2x - 7 \\ x = 7 \end{matrix}$$

$$11. \quad HJ = 3x + 5 \text{ and } IK = 5x - 9 \quad \begin{matrix} 26 \\ 3x + 5 = 5x - 9 \\ 26 = 2x \\ x = 13 \end{matrix}$$

$$12. \quad HJ = 3x + 7 \text{ and } IK = 6x - 11 \quad \begin{matrix} 25 \\ 25 \\ 3x + 7 = 6x - 11 \\ 18 = 3x \\ 6 = x \end{matrix}$$

$$13. \quad HJ = 19 + 2x \text{ and } IK = 3x + 22 \quad \begin{matrix} 13 \\ 13 \\ 19 + 2x = 3x + 22 \\ -3 = x \end{matrix}$$

For each rhombus, (a) find the measures of the numbered angles, and then (b) find the area.

Determine whether the quadrilateral can be a parallelogram. If not, write *impossible*. Explain your answer.

17. One pair of opposite sides is parallel, and the other pair is congruent. NO

18. Opposite angles are congruent and supplementary, but the quadrilateral is not a rectangle.

NO
