Johnson College's Health Career

On November 15th students were visited by Johnson College's traveling Health Career's Van. Students learned about careers in Healthcare including Xray technician, veterinary medicine, nursing, and radiology. This was a part of a unit they completed in their career's class funded by partners in education. During the unit, students met with various health professionals and solved a health care mystery. Healthcare is an essential part of life. Patients need proper care from compassionate people, and healthcare providers need to find the right people to fill those positions. Projections from the U.S. Bureau of Labor Statistics (BLS) show that healthcare jobs are expected to increase by 16% from 2020 through 2030. This means that the industry will add about 16.97 million new healthcare jobs. It is an exciting field to get into, and we hope 8th grade learned a little more about these exciting professions.
