

## *Locker rooms and Practice and Competition Facilities*

### ➤ ***i. Weight room***

Develop and document written practice schedules for the use of the weight room to ensure that these facilities are open to all student-athletes on an equitable basis.

- Upgrade the weight room facility for function and safety. Include a plan to educate coaches and student-athletes on the use of the weight room facility.

### ➤ ***j. Practice schedules***

Document practices schedules for the use of all gymnasiums to ensure that scheduling is equitable.

### ➤ ***k. Outdoor facilities***

Reevaluate the scheduling and assigning of outdoor facilities to ensure equity. With girls' soccer moving to the fall this presents an extra challenge to assigning field use. Developing and building a "field house" at the track and field facility to include locker rooms in order to move football practices back to the main campus will make the stadium field more available to other teams.

Continue efforts to improve facilities. Continue to provide overall maintenance to all facilities, especially outdoor facilities. Fields may be used extremely hard and may not be given rest time to recover.

- Improve the quality of all facilities and address any risk management concerns related to safety and hazardous conditions such as the starting blocks in the pool area.

### ➤ ***l. Coach space***

Re-evaluate office space for coaches to ensure that there is equitable access to office space for coaches. Football essentially has two office areas, one at the high school and one at the stadium. It may be necessary to rotate office space on an equitable basis.
