

Main Idea

Bananas grow on trees. They are yellow and grow in bunches. They are long and they curve a little bit. You peel them before you eat them. Strawberries are different from bananas. They grow on plants and do not grow in bunches. You don't have to peel them to eat them. They are red.

The main idea is:

- a. Bananas and strawberries are types of fruit you can eat.
- b. Bananas and strawberries are different from each other.
- c. Bananas are yellow but strawberries are red.
