Parts of Speech Bingo

The following list of call words can be used with this game. Multiple forms of the Parts of Speech Bingo board are not necessary as students can choose which part of speech square in which to place a chip. For example, if you call out “her,” there are several “pronoun” locations on the bingo board. Students should just choose one pronoun location and wait for the next pronoun to be called to cover the additional squares. The first student that has any horizontal row or vertical column correctly covered is the winner! (Note: some words could have multiple answers, but students can only use 1 part of speech/square per word.)
