

5a. Count All (use fingers, counters, and/or draw pictures)

- Students will count all objects in both groups, form a larger number, and state and/or write the answer (sum).
- **Ex.**

A visual equation illustrating the addition of two groups of objects. On the left, there are five blue circles arranged in two rows: two in the top row and three in the bottom row. To the right of the circles is a large black plus sign. Further right are two blue triangles arranged side-by-side. To the right of the triangles is a large black equals sign, followed by a large black number 7.

$$5 \text{ circles} + 2 \text{ triangles} = 7$$
